LESSON PLANNING

Verify curriculum and instructional references before export

Keep lesson citations credible by separating official curriculum documents from instructional and supplementary sources.

> GURONEXA PRACTICAL GUIDE
>
> Independent educational resource · Approx. 5 min reading time. Review applicability to your school before use.

1. Check the official document

Use the applicable official curriculum guide and school-approved Budget of Work if provided. Confirm the exact grade, term, competency wording, and effective implementation.

2. Record instructional sources accurately

When using textbooks or learner materials, copy authors, titles and pages only if they are visible in the provided source. Never invent missing publication details.

3. Identify supplementary materials

Teacher-prepared slides, worksheets, digital learning resources and external websites belong in a separate supplementary reference group.

4. Mark anything unverified

Use a clear marker such as “Teacher verification required” when a curriculum code, page, or week is unavailable.

5. Audit AI output

Compare the drafted lesson plan against the actual attached sources. Remove invented references and unsupported claims before distributing materials.

WORKED CLASSROOM EXAMPLE

Illustrative reference audit: “Curriculum — Official guide, Grade 7 Mathematics, verified topic and learning competency”; “Instructional — Teacher-provided learner material, page only if checked”; “Supplementary — Teacher-prepared slides, filename as given.” This is a structure example, not a formal citation for any particular competency.

Teacher review checklist

- ✓ Official source and applicability checked
- ✓ Competency wording matches source
- ✓ No invented codes, pages or years
- ✓ References classified by source type
- ✓ AI-generated citations independently reviewed

Check the original guidance

Use the official source to confirm applicability; GuroNexa does not reproduce or replace official DepEd documents.
